

Cell

- Scan entry
- Capture Data Matrix Code, create label
- Incoming goods inspection
- Insulation test
- Dielectric Strength test
- Dimensions measurement
- Power pulse, calculate DC IR
- OCV measurement
- Temperature measurement

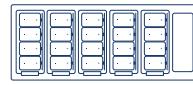

Module

- Capture RFID, Data Matrix Code
- Power pulse, calculate DC IR
- OCV measurement
- SOC alignment
- CAN + SPI communication
- E-Prom flashing
- HV test
- Insulation test, Dielectric Strength test
- Conditioning
- Camera process monitoring
- Data transfer to MES

Pack

- Capture RFID, Data Matrix Code
- Power pulse, calculate DC IR
- OCV measurement
- SOC alignment
- CAN + SPI communication
- E-Prom flashing
- HV test
- Insulation test, Dielectric Strength test
- Conditioning
- Camera process monitoring
- Dimensions measurement
- Weight measurement
- Data transfer to MES

h-kon master

Universal Tester for Battery Cells, Modules and Packs

h-kon GmbH

Theodor-Krumm-Str. 18
88213 Ravensburg

Universal Tester for Battery Cells, Modules and Packs

- Features integrated high-end measurement technology and industry-proven PC-based control technology with integrated safety control.
- Suitable for single measurements, small series, and fully automatic test systems.
- HV and LV interfaces housed in a cabinet. The test object is contacted using a cable set, enabling both manual and automatic contacting.
- Equipped with the **h-kon scan** test software, the tester forms a comprehensive testing system that meets all testing requirements.
- **h-kon scan** includes all software modules for testing cells, modules, and packs and can be expanded for specific customer requirements

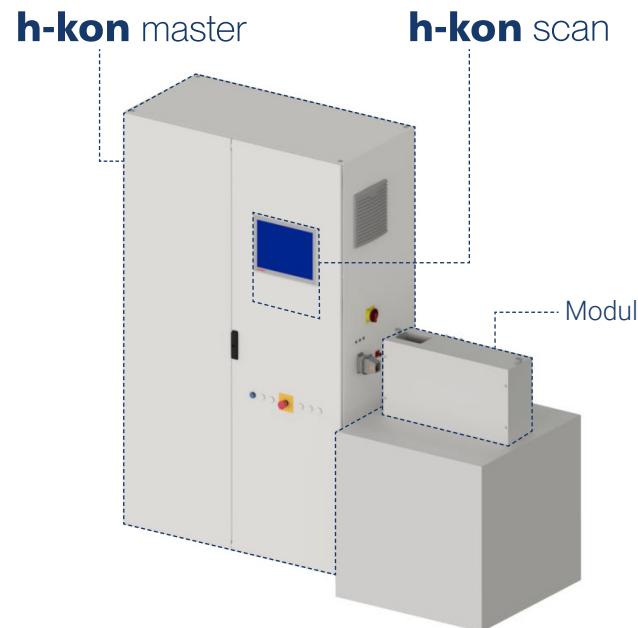

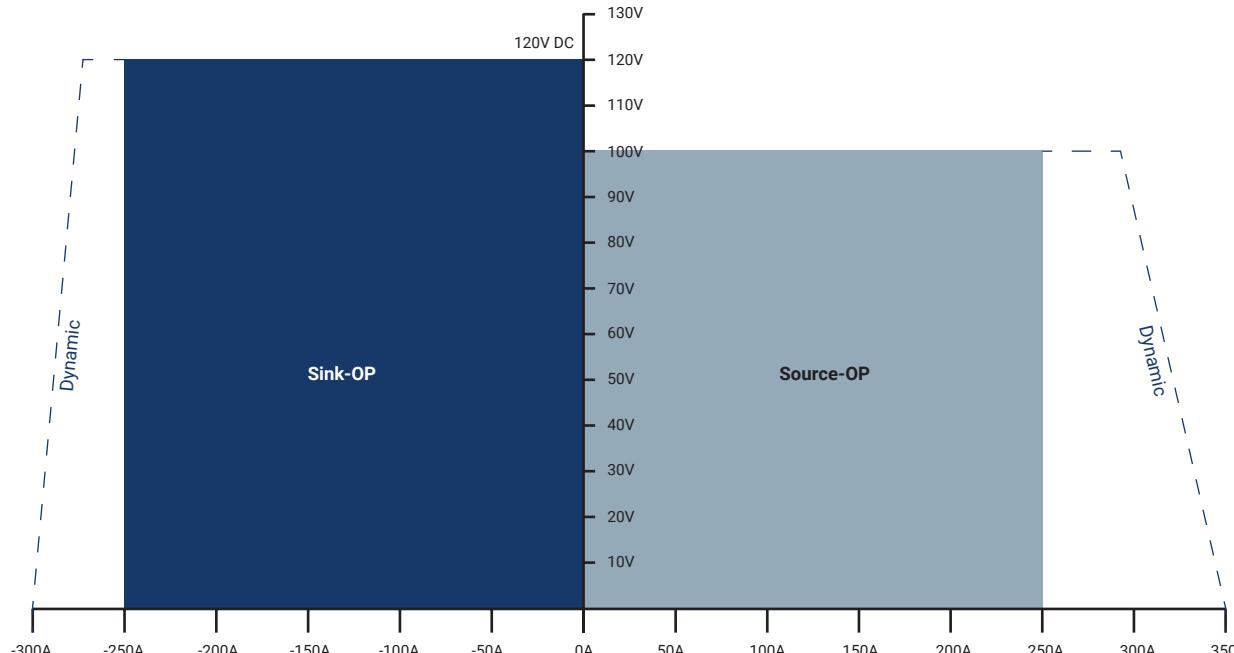

Figure: h-kon master 030

Technical Specifications

h-kon master 030

Power: 25 kW +/- 10% for 200 s

Source Voltage: 100 V

Source Current: 250 A, max. 350 A (200 s)

Sink Voltage: 120 V

Sink Current: -250 A, max. -300 A (200 s)

h-kon master 125

Power: 125 kW +/- 30% for 60 s

Source Voltage: 0...1,000 V

Source Current: 278 A, max. 430 A (25 s)

Sink Voltage: 20...1,000 V

Sink Current: -278 A, max. -430 A (25 s)

h-kon master 250

Power: 250 kW +/- 30% for 60 s

Source Voltage: 0...1,000 V

Source Current: 375 A, max. 450 A (25 s)

Sink Voltage: 20...1,000 V

Sink Current: -375 A, max. -450 A (25 s)

h-kon master 500

Power: 500 kW +/- 30% for 60 s

Source Voltage: 0...1,000 V

Source Current: 1,000 A, max. 1,200 A (25 s)

Sink Voltage: 20...1,000 V

Sink Current: -1,000 A, max. -1,200 A (25 s)
